

Commercial Building Management Guidelines for Employers and Employees

These guidelines apply to all commercial, non-residential buildings in regions of New York that have been permitted to <u>reopen</u> in Phase 2, as well as to commercial, non-residential building management activities statewide that were previously permitted to operate as essential. See Interim Guidance for Commercial Building Management During the COVID-19 Public Health Emergency for full details.

During the COVID-19 public health emergency, all owners/operators of commercial, non-residential buildings should stay up to date with any changes to state and federal requirements related to commercial, non-residential property management entities and incorporate those changes into their operations. This guidance is not intended to replace any existing applicable local, state, and federal laws, regulations, and standards.

laws, regulations, and standards. **Recommended Best Practices Mandatory** Ensure, together with tenants, that, during Phase II, Restrict/modify the number of workstations and **Physical** total occupancy is limited to 50% of the maximum employee seating areas, so that workers are at least six **Distancing** occupancy for a particular area as set by the certificate feet apart in all directions (e.g. side-to-side and when of occupancy. facing one another). A distance of at least 6 ft. must be maintained amongst Work with tenants to establish and enforce capacity all individuals at all times, unless safety of the core activity requires a shorter distance. Advise tenants to wear face coverings in common areas Any time workers or visitors must come within 6 ft. of including elevators, lobbies, and when traveling around another person, acceptable face coverings must be worn (ensuring that mouth and nose are covered). Individuals must be prepared to don a face covering if Consider closing any common indoor or outdoor seating another person unexpectedly comes within 6 ft. Prohibit the use of confined spaces (e.g. elevators, Remind individuals to wear masks face coverings in vehicles) by more than one individual at time, unless all shared spaces (e.g. lobby, corridors, elevators, common individuals are wearing face coverings. If occupied by outdoor space) when a minimum six feet of separation is more than one person, keep occupancy under 50% of not possible. maximum capacity. Reduce bi-directional foot traffic using tape or signs with Post social distancing markers using tape or signs that arrows in narrow aisles, hallways, or spaces, and post denote 6 ft. of spacing in commonly used and other signage and distance markers denoting spaces of six feet applicable areas (e.g. clock in/out stations, health in all commonly used areas and any areas in which lines screening stations, restrooms). are commonly formed or people may congregate (e.g. elevator entrances, escalators, lobbies, clock in/out Limit in-person gatherings as much as possible and use stations, health screening stations, etc.). tele- or video-conferencing whenever possible. Close non-essential amenities and communal areas that Essential in-person gatherings (e.g. meetings) should be held in open, well-ventilated spaces with appropriate promote gathering or are high-touch (e.g. vending social distancing among participants. machines, communal coffee machines). Implement practices to maintain adequate social Stagger worker schedules to observe social distancing for distancing in small areas, such as restrooms and any gathering. breakrooms, and signage and systems (e.g. flagging Limit on-site interactions (e.g. designate an egress for when occupied) to restrict occupancy when social distancing cannot be maintained in such areas. individuals leaving their shifts and separate ingress for individuals starting shifts) and movements (e.g. workers Close non-essential common areas (e.g. game rooms). should remain near workstations as often as possible).

and disinfected between users.

Establish designated areas for pickups and deliveries.

Shared workstations (e.g. "hot-desks") must be cleaned

screenings.

Limit the numbers of entrances in order to manage the flow of visitors into the building and facilitate health

Commercial Building Management Guidelines for Employers and Employees

These guidelines apply to all commercial, non-residential buildings in regions of New York that have been permitted to reopen in Phase 2, as well as to commercial, non-residential building management activities statewide that were previously permitted to operate as essential. See Interim Guidance for Commercial Building Management During the COVID-19 Public Health Emergency for full details.

	Mandatory	Recommended Best Practices
Protective Equipment	Provide workers with an acceptable face covering at no- cost to the employees/contractors and have an adequate supply of coverings in case of need for replacement.	Install physical barriers at reception and security desks (e.g. plexiglass or similar materials) in accordance with th OSHA guidelines.
	Acceptable face coverings include but are not limited to cloth (e.g. homemade sewn, quick cut, bandana), surgical masks, and face shields.	
	Clean, replace, and prohibit sharing of face coverings. Consult the CDC <u>guidance</u> for additional information on cloth face coverings and other types of personal protective equipment (PPE), as well as instructions on use and cleaning.	
	Train workers on how to don, doff, clean (as applicable) and discard PPE (training should be extended to contractors if the building managers/owners supply contractors with PPE).	
	Limit the sharing of objects (e.g. touchscreens) and discourage touching of shared surfaces; or, when in contact with shared objects or frequently touched areas, wear gloves (trade-appropriate or medical); or, sanitize or wash hands before and after contact.	
Building Systems	Prior to reopening, complete pre-return checks, tasks, and assessments to ensure and healthy and safe environment, including but not limited to, mechanical systems, water systems, elevators, and HVAC systems.	
	Receive verification of suitability for occupancy from building engineers before occupants return to buildings	

Commercial Building Management Guidelines for Employers and Employees

These guidelines apply to all commercial, non-residential buildings in regions of New York that have been permitted to <u>reopen</u> in Phase 2, as well as to commercial, non-residential building management activities statewide that were previously permitted to operate as essential. See Interim Guidance for Commercial Building Management During the COVID-19 Public Health Emergency for full details.

During the COVID-19 public health emergency, all owners/operators of commercial, non-residential buildings should stay up to date with any changes to state and federal requirements related to commercial, non-residential property management entities and incorporate those changes into their operations. This guidance is not intended to replace any existing applicable local, state, and federal laws, regulations, and standards.

Recommended Best Practices Mandatory Adhere to hygiene, cleaning, and disinfection Avoid use of furniture that is not easily cleaned and Hygiene and requirements from the Centers for Disease Control and disinfected (e.g. cloth fabric sofas). Cleaning Prevention (CDC) and Department of Health (DOH) and maintain cleaning logs on site that document date, Wherever possible, increase ventilation of outdoor air time, and scope of cleaning. (e.g. opening windows and doors) while maintaining safety precautions. Provide and maintain hand hygiene stations in office, including handwashing with soap, running warm water, and disposable paper towels, as well as an alcoholbased hand sanitizer containing 60% or more alcohol for areas where handwashing is not feasible. Provide and encourage participants to use cleaning/disinfection supplies before and after use of shared and frequently touched surfaces, followed by hand hygiene. Ensure that equipment is regularly cleaned and disinfected using registered disinfectants, including at least as often as employees and contractors change workstations. Perform cleaning and disinfecting of facilities, shared surfaces, and other areas, as well as shared objects, at least after each service, using Department of Environmental Conservation (DEC) products identified by the Environmental Protection Agency (EPA) as effective against COVID-19. Regularly clean and disinfect the site and more frequently clean and disinfect high risk areas used by many individuals and for frequently touched surfaces. Rigorous cleaning and disinfection must occur at least after each shift, daily, or more frequently as needed. Regularly clean and disinfect the location or facility and conduct more frequent cleaning and disinfection for high risk areas used by many individuals (e.g. restrooms) and for frequently touched surfaces. Prohibit shared food and beverages (e.g. buffet style meals).

Commercial Building Management Guidelines for Employers and Employees

These guidelines apply to all commercial, non-residential buildings in regions of New York that have been permitted to reopen in Phase 2, as well as to commercial, non-residential building management activities statewide that were previously permitted to operate as essential. See Interim Guidance for Commercial Building Management During the COVID-19 Public Health Emergency for full details.

	Mandatory	Recommended Best Practices
Hygiene and Cleaning (cont'd)	Provide cleaning and disinfection of exposed areas in the event of an individual is confirmed to have COVID-19, with such cleaning and disinfection to include, at a minimum, all heavy transit areas and high-touch surfaces (e.g. elevators, lobbies, building entrances, badge scanners, restrooms handrails, door handles).	
Communication	 Affirm you have reviewed and understand the state-issued industry guidelines, and that you will implement them. Post signage inside and outside of the office location to remind personnel and customers to adhere to proper hygiene, social distancing rules, appropriate use of PPE, and cleaning and disinfecting protocols. Train all personnel on new protocols and frequently communicate safety guidelines. Establish a communication plan for employees, and visitors with a consistent means to provide updated information. Coordinate with tenants to receive list of essential visitors expected to enter the building. Maintain a continuous log of every person, including workers and visitors, who may have close contact with other individuals at the work site or area; excluding customers and deliveries that are performed with appropriate PPE or through contactless means. If a worker, or visitor was in close contact with others at the office location and tests positive for COVID-19, employer must immediately notify state and local health departments and cooperate with contact tracing efforts, including notification of potential contacts, such as workers, visitors, and/or customers (if known) who had close contact with the individual, while maintaining confidentiality required by state and federal law and regulations. 	Work with tenants to develop webpages, text and email groups, and social media campaigns to provide information to workers, customers, and visitors that include instructions, training, signage, and information.

Commercial Building Management Guidelines for Employers and Employees

These guidelines apply to all commercial, non-residential buildings in regions of New York that have been permitted to reopen in Phase 2, as well as to commercial, non-residential building management activities statewide that were previously permitted to operate as essential. See Interim Guidance for Commercial Building Management During the COVID-19 Public Health Emergency for full details.

	Mandatory	Recommended Best Practices	
Communication (cont'd)	Conspicuously post completed safety plans on site.		
Screening	 Employees who are sick should stay home or return to home, if they become ill at work. Implement mandatory health screening assessment (e.g. questionnaire, temperature check) for employee and visitors, asking about (1) COVID-19 symptoms in past 14 days, (2) positive COVID-19 test in past 14 days and/or (3) close contact with confirmed or suspected COVID-19 case in past 14 days. Responses must be reviewed and documented daily. If a person has COVID-19 symptoms AND EITH tests positive for COVID-19 OR did not receive test, the individual may only return after completing a 14-day self-quarantine. If a person does NOT have COVID-19 symptom BUT tests positive for COVID-19, the individual may only return after completing a 14-day self quarantine. If a person has had close contact with a person with COVID-19 for a prolonged period of time AND is symptomatic, the individual should follow the above protocol for a positive case. If a person has had close contact with a person with COVID-19 for a prolonged period of time AND is NOT symptomatic, the individual must complete a 14 day self-quarantine. Tenants are responsible for screening their own employees and visitors, but tenants and building management should coordinate to facilitate screening 	intermingling in close contact with each other prior to completion of the screening, if on site. Daily temperature checks may be conducted per Equal Employment Opportunity Commission or DOH guidelines. Screen individuals at or near the building entrance (if space allows) to minimize the impact of a positive individual in case of a suspected or confirmed case of COVID-19. Coordinate with tenants to identify individuals who have completed a remote screening. Use contactless thermal cameras in building entrances, in coordination with building management, to identify potentially symptomatic visitors and direct them to a secondary screening area to complete a follow-on screening. Identify a point-of-contact as the party for workers and visitors to inform if they later are experiencing COVID-19 related symptoms, as noted in the questionnaire.	

Commercial Building Management Guidelines for Employers and Employees

These guidelines apply to all commercial, non-residential buildings in regions of New York that have been permitted to <u>reopen</u> in Phase 2, as well as to commercial, non-residential building management activities statewide that were previously permitted to operate as essential. See Interim Guidance for Commercial Building Management During the COVID-19 Public Health Emergency for full details.

	Mandatory	Recommended Best Practices
Screening (cont'd)	On-site screeners should be trained by employer- identified individuals familiar with CDC, DOH, and OSH protocols and wear appropriate PPE, including at a minimum, a face covering.	Α
	Allow for adequate social distancing while individuals queue for screening and/or building entry.	
	Have a plan for cleaning, disinfection, and contact tracing in the event of a positive case.
